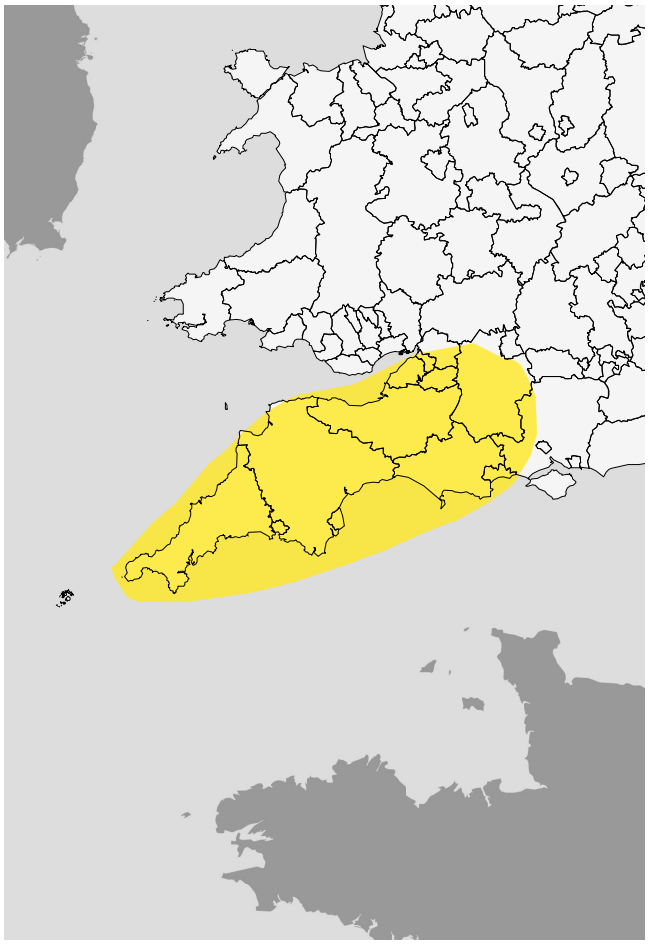
Yellow warning
Lightning

Between
14:51 Sat 18 Jun 2022 and
19:00 Sat 18 Jun 2022



An area of storms producing lightning may lead to disruption in the coming hours

What to expect

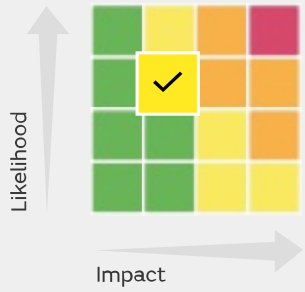
- Some short term loss of power or other utility services is possible
- Possibly some damage to some buildings/structures

Further details

An area of storms is expected to move northeastwards across southwest and into southern England Saturday afternoon.

These may bring frequent lightning to sites for a short period of time before they clear to the northeast. A brief period of heavy rain is also likely but given the speed of movement lightning is thought more likely to be a hazard.

The most frequent lightning is likely to be in parts of Cornwall and Devon.



✓ Medium likelihood of low impacts

Issued at 14:51 Sat 18 Jun, 2022
